Nový autorouter na báze umelej inteligencie, zatiaľ zdarma.
https://deeppcb.ai/
Our Beta release covers the following features:

- Routing for Printed Circuit Boards of up to 150 pairs, 2 layers is currently available. DeepPCB™ is currently free.

- All our solved boards are Design Rules Checked (DRC clean) and fully compatible with KiCad.

- DeepPCB™ leverages innovative InstaDeep AI technology combined with powerful GPUs and Cloud infrastructure to offer the first pure AI PCB routing engine.

- Results in 24 hours, not weeks or months. Saved time accelerates your development cycle and your product ships to market faster.

Beta version Limitations:

- Input boards file : Specctra ( .DSN )

- Output results file : Specctra session file ( .SES )

- limited to : 2 Layers, 250 Pins, 150 Airwires
