Zmeny voči predchádzajúcej verii 5.7.1 sú:

- Fixed displaying combo boxes on Windows Vista and Windows 7 with "extra large fonts".
- Fixed sluggish performance, especially after UNDO/REDO with schematics that contain many sheets.
- Fixed printing on Mac OS X 10.6 with some printer drivers (for instance the "HP Laserjet 5100 Series").
- Fixed a memory leak in case a toolbar is wider than the editor window.
- The link to the Freemium web page is now clickable.
- Fixed the height of the "EAGLE License" page in the Setup dialog.
