

Rýchly a flexibilný real-time OS, je teraz k dispozícii aj pre procesory OMAP35x TI s architektúrou Cortex-A8. Vývojári teraz môžu kombinovať efektívnosť a škálovateľnosť softvéru RTX s výkonom a energetickou efektívnosťou procesorov OMAP35x.

RTOS je známy svojou účinnosťou, vysokým výkonom a svojou minimalizáciou. Quadros Systems teraz poskytuje toto flexibilné riešenie aj pre zákazníkov využívajúcich MCU OMAP35x.

## Vlastnosti

- Fast - Low system overhead, low latency and responsive services.
- Small with no compromises - Revolutionary features give you all the power in a small footprint size.
- Powerful - Rich set of kernel objects and services.
- Stable and reliable - Proven technology, used across a broad range of industries.
- Extensive development tool support - Maintain your previous investments in tools, a wide range of tool choices.
- Integrated stacks and middleware - Integrated software and drivers to support popular peripherals.
- Training and support - Deal directly with our seasoned engineering team, take part in our 3 day training sessions.
- Future-proof spectrum - Highly scalable technology can support your changing needs tomorrow.
- Easy to use; powerful configuration and design tools - Enjoy the highest level of tool support from any RTOS supplier. A graphical design tool as well as a configuration tool are at your disposal.
- Flexible licensing models - Choose from royalty free project licenses, product family licenses, subscription models and more.
